

Computer Ownership - Essential to Digital Equity

We Can Help You Leverage ARPA
Funds to Advance Device Ownership

55 million people in the United States don't have a computer. This affects their ability to work, attend school, access healthcare, and much more.

Computers are critical. Our nationwide network and 36 years of experience are uniquely positioned to help provide connected devices to residents in your community.

In partnership with our Digital Opportunity Network members, we provide:

Device Ecosystem Design & Implementation

- Distribution, logistics and deployment support
- Partner and relationship development and management
- Workforce development integration
- Cybersecurity awareness
- Digital skills training

Supply Chain for Free/Low Cost Computers

- Sourcing and distribution of devices
- Device refurbishing and technical support
- Secure data wiping | destruction services
- Donation logistics coordination
- Corporate social responsibility programs
- Environmental sustainability benefits
- Community engagement | device donation drives

An initiative of the nonprofit National Cristina Foundation, Digitunity believes that everyone who needs a computer should have one, and no one should be left behind.

Drawing from a national network of 1,500 nonprofit practitioners and an alliance of 85 nonprofit computer refurbishers working to close the digital divide, Digitunity can help provide solutions to advance digital equity and device ownership in your community.
